Inclusive Urban Sanitation: No One Is Left Behind

6 Week Online Course
Starting On 13 May 2020

10% early bird discount applicable till 3 May 2020!

Structure
- Module 1: Introduction to Urban Sanitation and Its Policy Environment
  - What is sanitation?
  - Sanitation operational and value chains and types of waste
  - Urban sanitation policies and programmes including Sustainable Development Goals (SDGs)
  - Impact of urban sanitation on human well-being
- Module 2: Solid Waste Management (SWM): Process and Systems
  - SWM: Policy and regulatory regime
  - SWM: Centralised and decentralised planning
  - SWM: Technology options
  - Case examples on inclusive SWM
- Module 3: Liquid Waste Management (LWM): Process and Systems
  - LWM: Policy and regulatory regime with a focus on Faecal Sludge Management
  - LWM: Centralised and decentralised planning
  - LWM: Technology options
  - Case examples on inclusive LWM
- Module 4: Innovative, Inclusive and Participatory Strategies for Addressing Urban Sanitation
  - Multistakeholder participation in the sanitation value chain and management
  - Tools and techniques for Increasing community participation in planning and management for urban sanitation
  - Innovations in participatory sanitation management
  - Key issues and challenges and way forward

Rationale
Rapid increase in urbanisation has put enormous pressure on basic service delivery in Indian cities. This urban growth has been evidently uneven with rising number of informal settlements both within and in the periphery of the cities. These informal settlements lack access to basic services, particularly sanitation services. India has long been regarded as the country with the largest share of people defecating in the open. In the last decade, with major interventions from the central, state and local governments, access to sanitation services has improved. However, the main challenge is to enhance the inclusivity of the urban poor and their participation across the sanitation service chain.

This course will equip the participants with the fullest understanding on various components of urban sanitation. It will provide in-depth knowledge on public policies and programmes on urban sanitation in India and the efforts of Indian civil society organisations to make sanitation services inclusive, participatory and sustainable.

Objectives
- Developing an understanding on various components of urban sanitation services, public policies and programmes in the Indian context
- Developing an understanding of solid waste management (SWM) and liquid waste management (LWM) processes and participatory planning and monitoring of SWM and LWM
- Developing an in-depth understanding of participatory methods of engaging citizens with a particular focus on the engagement of the urban poor.
Who Are We?

PRIA International Academy (PIA), established in 2005, offers educational opportunities to university students, practitioners, and researchers to enhance their knowledge and skills. PIA as the educational wing of PRIA (Participatory Research in Asia) draws on practical lessons from the action learning projects of PRIA implemented over the last four decades combined with experiences of other organisations.

The educational offerings by PIA are the perfect blend of practice based experience and academic rigour. PIA is the recognised Indian Hub for Knowledge for Change (K4C) (an initiative of the UNESCO Chair on Social Responsibility of Higher Education and Community Based Participatory Research). It offers:

- Online Courses
- Blended Mode Learning Programmes
- Training and Workshops
- Research and Consulting Services
